# USER'S MANUAL FOR THE RACT/BACT/LAER CLEARINGHOUSE (RBLC) STANDALONE EDITOR

# CLEAN AIR TECHNOLOGY CENTER

# SPONSORED BY:

Information Transfer Group Office of Air Quality Planning and Standards U.S. Environmental Protection Agency Research Triangle Park, North Carolina 27711

Date: April 2003

# **DISCLAIMER**

This report has been reviewed by the Information Transfer and Program Integration Division of the Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency and approved for publication. Approval does not signify that the contents reflect the views and policies of the U.S. Environmental Protection Agency. Mention of trade names or commercial products is not intended to constitute endorsement or recommendation for use. Copies of this report are available from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161, telephone (800) 553-6847.

#### **PREFACE**

This user's manual was prepared for and funded by the RACT/BACT/LAER Clearinghouse (RBLC), U.S. Environmental Protection Agency (EPA). The RBLC has been established and is maintained by the Clean Air Technology Center (CATC) to assist State and local air pollution control personnel in making control technology determinations and in sharing technology information.

The RBLC provides data on prevention and control technology determinations made primarily by State and local permitting agencies. The Clearinghouse contains over 4,000 determinations that can help the user to identify appropriate technologies to mitigate or treat most air pollutant emission streams. The RBLC was designed to help permit applicants and reviewers make pollution prevention and control technology decisions for stationary air pollution sources and includes data submitted by 50 states and territories in the U.S. on over 200 different air pollutants and 1,000 industrial processes.

The RBLC Standalone Editor allows users who cannot access the RBLC Web Site to enter new data into a standalone program and then send the data to the EPA for inclusion in the RBLC Web Site.

<sup>&</sup>lt;sup>1</sup> NOTE: RACT, BACT and LAER are acronyms for different Clean Air Act program requirements combined to create the name "RACT/BACT/ LAER Clearinghouse." RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards (i.e., non-attainment areas). BACT, or Best Available Control Technology, is required on major new or modified sources in "clean" areas (i.e., attainment areas). LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas. However, data in the Clearinghouse is not limited just to sources subject to these requirements. Noteworthy prevention and control technology decisions are included in the RBLC even if they are not related to RACT, BACT, or LAER decisions.

# TABLE OF CONTENTS

# **VOLUME I: RBLC BASICS**

# **VOLUME II: RBLC DATA ENTRY**

Disclaimer	ii
Preface	iii
Section	Page
Section 5.5 RBLC Standalone Editor	5.5-1
5.5.1 Installation	5.5.1
5.5.2 Starting the Program	5.5.2
5.5.3 Using the Program	5.5-2
5.5.3.1 Using the Editor's Help System	5.5-3
5.5.3.2 Add A New Determination	5.5-3
5.5.3.3 Delete An Existing Determination	5.5-3
5.5.3.4 Edit An Existing Determination	5.5-4
5.5.3.5 Creating An Editor Upload File	5.5-8
5.5.3.6 Preview or Print A Determinations Report	5.5-9
5.5.4 Sending An Editor Upload File To EPA	5.5-10
5.5.5 Planning and Preparation	5.5-11
5.5.6 Data Fields and Formats	5.5-13
Appendix C Process Type Code Listing	C-1
Appendix D Abbreviations for Processes, Units, and Pollutants Abbreviations for Processes and Descriptors Abbreviations for Emission Limit Units Abbreviations for Pollutants	D-1
Appendix E – RBLC Standard Emission Limit Units by Process Type Code	E-1

#### 5.5 STANDALONE EDITOR

#### 5.5.1 INSTALLATION

The RBLC Standalone Editor is an independently executable program without any special software licenses. The Editor runs on an IBM compatible desktop computer with the following minimum requirements:

- Intel Pentium 90MHz or equivalent with 32MB RAM
- Microsoft Windows 95, 98, NT, 2000, XP, or ME software environments

PLEASE NOTE: If you have previously installed the RBLC Standalone Editor and have downloaded a new version for upgrade purposes, you MUST finalize all of your current determinations, generate an upload file, and uninstall the previous version before executing the setup program for the new Editor version. If you do not follow this procedure you WILL lose data and the new version may not function properly.

To install the Editor, download the Zip file from the RBLC web site. Then, do the following:

- 1. Un-compress the download file into a temporary directory on your PC. (PKZip or WinZip is required for this operation.)
- 2. Find SETUP.EXE in the directory.
- 3. Run SETUP.EXE and follow its directions.

After following the program's installation procedure, the program is ready to use.

To uninstall the program,

- 1. Press the Windows System Tray Start Button.
- 2. Go to Settings and click on Control Panel.
- 3. Double-click on Add/Remove Programs.
- 4. Click on Install/Uninstall Tab.
- 5. Find RBLC Editor in list of installed programs and select it.
- 6. Press Add/Remove Button.
- 7. Program is now being removed from the PC.
- 8. Press OK Button to return to Control Panel.
- 9. Press File/Close to exit from Control Panel. The Upload Files and Archive Files sub-directories and any files located in them will remain after the uninstall process. If you wish to remove them from your system, they must be removed manually. If you intend to reinstall the Editor with a new version, these files can remain and will not be affected.

#### 5.5.2 STARTING THE PROGRAM

- 1. Press the Windows System Tray Start Button.
- 2. Locate and click on RBLC Standalone Editor shortcut in the Windows Menus.

#### Notes:

• The first time the Editor is started, a fresh database is created for storage of new determinations. After creating the new database, the program displays "No existing program database found, created new database" in a message box. Press the OK button to continue

#### **5.5.3** Using the Program

After starting the editor program, the main menu displays the following operations:

- Add Determination (add a new determination to the Editor)
- Edit Determination (modify an existing determination in the Editor)
- **Get Help** (get help on how to use the Editor)
- **Delete Determination** (delete an existing determination in the Editor)
- Create Upload File (create a file containing the Editor's data for EPA)
- **Preview/Print Report** (view or print a list of determination data)
- Exit (quit Editor and return to Windows)

During editor usage, moving the mouse pointer over items in the editor window displays help near the item. Clicking on the Help button near the top of each window opens the Editor's Help System.

#### For keyboard users:

- Use the Tab key to move from one box or button to another.
- To select a button utilizing the underlined letter, simultaneously press the Alt key & the underlined letter key
- In pull-down list boxes, use the F4 key to see items and the down arrow to select an item.

#### 5.5.3.1 Using The Editor's Help System

The Editor's Help System can be accessed either from the Main Menu by pressing the Get Help button or from any of the Editor windows by pressing the Help button near the top of the window

When the help system is activated, either the full help document may be read by scrolling down the displayed document, or specific information may be found by entering the text in the Enter Find Text box and pressing the Find button. Repeatedly pressing the Find button acts as a Find Next button and cycles through the document. Use the Print button to print all or part of the help information. To quit using the Help System, press the Quit button.

#### 5.5.3.2 ADD A NEW DETERMINATION

To add a new determination to the Editor:

- 1. Go to the Editor's main menu.
- 2. Press the Add Determination button.
- 3. In the Select Criteria For Add window, select the state abbreviation (2- characters) where the Facility is located from the State pull-down box.
- 4. Press the ADD Facility button to create a new determination form to enter data or the Cancel button to return to the main menu. (For more information on adding data to this form, please go to Section 5.5.3.4, titled "Edit An Existing Determination.")

#### 5.5.3.3 DELETE AN EXISTING DETERMINATION

To delete a determination from the Editor:

- 1. Go to the Editor's main menu.
- 2. Press the Delete Determination button.
- 3. In the Select Criteria For Delete window, select the existing Plant Facility (State, RBLC-ID, Plant Facility) to be deleted from the pull-down list box.
- 4. Press the DELETE Facility button to delete it or the Cancel button to return to the main menu.

#### 5.5.3.4 EDIT AN EXISTING DETERMINATION

A determination has three parts: a Facility section, a Process section, and a Pollutant section.

To start editing a determination:

- 1. Go to the Editor's main menu.
- 2. Press the Edit Determination button.
- 3. In the Select Criteria For Edit window, select existing Plant Facility (State, RBLC-ID, Plant Facility) to be edited from the pull-down list box.
- 4. Press the EDIT Facility button to edit it or the Cancel button to return to the main menu.
- -- Edit Facility Section --

In Facility section, add or edit data in following text boxes or pull-down list boxes:

- Add the Company Name.
- Add the Plant Name.
- Fill in the Plant Contact Name, Telephone, and E-mail Address.
- · Add the Contact Street Address.
- Add the Contact City.
- Add the Contact Zip or Postal Code.
- Enter the Plant County (physical location).
- Select the Plant Region (use region pull-down box to select the Region Number).
- Enter the Plant Location UTM (Universal Transverse Mercator) Grid Zone Number.
- Enter the Plant Location UTM East Coordinates Number.
- Enter the Plant Location UTM North Coordinates Number.
- Select Yes or No from the pull-down box as to whether a public hearing was held.
- The Entered Date box shows the date the determination was created. (auto-assigned)
- The Updated Date box shows the date the determination was last modified. (auto-assigned)
- Select the Issuing Agency (State-Code, Agency Name) from the pull-down box. (If "NOT FOUND" is selected, enter the Agency name in the Facility Notes box.)
- Select the Agency Contact (State, Name) from the pull-down box. (If "NOT FOUND" is selected, enter the contact's name and phone number in the Facility Notes box.)
- Select the Construction Type (New/Modification) from New/Mod pull-down list box.
- Enter the Issuing Agency Permit Number in Permit/File # box.
- Enter the EPA AIRS ID Number in Universal Plant ID box.
- Select the SIC (Standard Industrial Classification) code from SIC pull-down list box.
- Enter NAICS (North American Industrial Classification System) code(s) in the NAICS box.
- For the Estimated/Actual Dates area:
  - Application Received (APPL RCVD) Start-Up (START-UP)

- Permit Issued (PERMIT ISSUE) Compliance Verified (COMPL VERIFY)
  - 1. Select (Estimated or Actual) Date from pull-down box.
  - 2. Press the Date button to enter the date into the pop-up window:
    - Use Month, Day, and Year pull-downs to set the date.
    - Press the Enter button to enter the date, the No Date button to clear a date, or the X button (Alt-F4) to cancel.
- Enter any explanatory information about the determination in the Facility Notes box.
- Enter a description of the plant and its emissions in the Plant Narrative box.
- Enter a description of the plant's emission sources in the Emission Sources box.
- List the fuels used at the plant in the Fuel box.
- Describe the methods used to reduce the plant's emissions in the Abatement Description box.
- Enter any Affected Boundaries information (sensitive areas affected by the plant's pollutants) by pressing the Add/Edit Affected Boundaries button:
  - To add an affected boundary to the table:
    - 1. Select a boundary from the Boundary pull-down list box
    - 2. Enter the distance of your plant from the Boundary (kilometers) in the Distance box.
    - 3. Press the Add button to add the data to the table.
  - To delete boundary from the table:
    - 1. Select boundary from the Boundary pull-down list box.
    - 2. Press the Delete button to delete it.

When using the Add or Delete buttons in the table, the data change is saved automatically. Press the Done button to go back to the previous window.

- Enter any Plantwide Emissions information (pollutants emitted by the plant) by pressing the Add/Edit Plantwide Emissions button:
  - To add a pollutant to the table:
    - 1. Select a pollutant from the Pollutant pull-down list box.
    - 2. Enter the Emissions Rate After Control/Prevention (in T/YR) in the box.
    - 3. Press the Add button to add the data to the table.
  - To delete a pollutant from the table:
    - 1. Select a pollutant from the Pollutant pull-down list box.
    - 2. Press the Delete button to delete it.

When using the Add or Delete buttons in the table, the data change is saved automatically. Press the Done button to go back to the previous window.

After editing the data, use one of the following buttons to continue:

- Back (ask to save data and return to previous window).
- Go To Main Menu (ask to save data and then go to main menu).
- Go To Process List (save data and go to Process section ).

- Save (save data).
- -- Edit Process Section --

When entering the Process section, use the initial Process selection window to either:

- Edit an existing process by first selecting one from the Existing Process pull-down list box and then pressing the Edit button to edit it.
- Add a new process by pressing the Add New button. After pressing this button, the Process section window is displayed. Enter the desired name and then continue to add information to this window.
- Go back to the previous window by pressing the Cancel button.
- Go to the main menu by pressing the Go To Main Menu button.

Add or edit Process section data by using the following text boxes or pull-down list boxes:

- Enter the name of the process involved in the permitting decision in the Process box.
- Select the type of process that produces the emissions from the Process Type pull-down.
- List the EPA Source Classification Code (SCC) in the SCC Code box.
- Enter the primary fuel used by this process in the Primary Fuel box.
- Enter a value for the throughput/capacity of the process unit in the Throughput box.
- Enter the throughput/capacity units used for the process in the Throughput Units box.
- Using Y/N (Yes/No) pull-downs, answer the questions as to How Compliance Has Been Verified. If the compliance verification option is "Other," enter the compliance description in the Describe Other box.
- Enter any notes about the process or its compliance in the Process/Compliance Notes box.

After editing the data, use one of the following buttons to continue:

- To Process List (ask to save data and return to the Process List window).
- Add Another (save and add another new process).
- Go To Main Menu (ask to save data and then go to the main menu).
- Go To Pollutant List (save data and go to the Pollutant section ).
- Save (save data).
- Delete Current Process (delete the displayed process).

#### -- Edit Pollutant Section --

When entering the Pollutant section, use the initial pollutant selection window to either:

- Edit an existing pollutant by first selecting one from the Existing Pollutant pull-down list box and then pressing the Edit button to edit it.
- Add a new pollutant by pressing the Add New button. After pressing this button, select the new pollutant from the Pollutant pull-down list box and press the Add button to add it.
- Go to the Process List by pressing the To Process List button.
- Go back to the previous window by pressing the Cancel button.
- Go to the main menu by pressing the Go To Main Menu button.

Add or edit the Pollutant section data by using the following text boxes or pull-down list boxes:

- Select the method used to achieve emission limit from the Poll Reduction Method pull-down.
- Enter a description of the pollution prevention and/or add-on control equipment used in the Poll.Prevent./Add-on Description box.
- Enter the number of control options considered for this pollutant in the Number Of Control Options Considered box.
- Enter the rank (number indicating rank order of options from most to least effective) of the option selected in the Rank Of Option Selected box.
- In the Emission Limit 1 box, enter a value for the primary emission limit listed in the permit.
- In the Emission Limit 1 Unit box, enter the units for the limit (e.g., LB/MMBTU).
- In the Emission Limit 1 Other Conditions box, enter details about the emission limit.
- In the Emission Limit 2 box, enter a value for the alternative emission (if on permit).
- In the Emission Limit 2 Unit box, enter the units for the limit (e.g., LB/MMBTU).
- In the Emission Limit 2 Other Conditions box, enter details about the emission limit.
- In the Standardized Limit box, enter a value for the RBLC Standardized emission limit (if required, see Appendix E).
- In the Standardized Unit box, enter the units for the limit (e.g., LB/MMBTU).
- In the Standardized Other Conditions box, enter details about the emission limit.
- Select the regulatory program on which the emission limit was based from the Basis pull-down.
- Enter the expected efficiency of control in the % Efficiency box (do not include the % sign). (The number entered is displayed as ###.#####, e.g., 98.75 becomes 98.75000.)
- Select the type of the emission source from the Emission Type pull-down.
- Select if costs have been verified (Y/N) from the Costs Verified By Agency pull-down..
- Enter the capital cost (dollars) of control equipment in the Cap Cost Of Control Equip box.
- Enter the annual operation and maintenance cost (dollars) of the control equipment in the O/M Cost Of Control Equip box.

- Enter the year (e.g., 2001) of dollar used in cost calculations in the Year Used In Cost Estimates box.
- Enter the annualized cost of the equipment (dollars) in the Annualized Cost box.
- Enter the cost effectiveness (dollars) in the Cost Effectiveness \$/Ton box.
- Enter the incremental cost effectiveness (dollars) in Incremental Cost Effectiveness \$/Ton box.

After editing the data, use one of the following buttons to continue:

- To Pollutant List (ask to save data and return to Pollutant List window).
- Add Another (add another new pollutant).
- Go to the Process List by pressing the To Process List button.
- Go To Main Menu (ask to save data and then go to the main menu).
- Save (save data).
- Delete Current Pollutant (deletes pollutant that is currently displayed).

#### 5.5.3.5 CREATING AN EDITOR UPLOAD FILE

In order to submit your determination data to the Clearinghouse, you must create an upload file.

The first time that you prepare an upload file to send to the RBLC, the software creates two folders: an upload folder and an archive folder. The determinations that you select to send to the RBLC are removed from the working data base when the upload file is created. This is necessary to keep duplicates from being uploaded to the Online RBLC. A copy of the upload file is placed in the upload folder, and a copy of the entire working data base is placed in the archive folder. To send your entries to the RBLC via E-mail or on a floppy disk, you must go to the upload folder and select the file you want to send to the RBLC and attach it to your E-mail or copy it to a floppy disk. Copies of your submittal will remain in both the upload and archive folders. In fact, both of these folders will remain even if you un-install the program; however, you can manually delete them.

When the Editor Upload File is created, the following activities are performed:

- The existing working database is copied to the Archive Files sub-directory. This copy will contain all of your determinations. This archive copy will not be modified.
- The Editor Upload File is created based upon determinations you have selected for upload. This file is named based on the following scheme: "mmddyyRBLChhmmssB.mdb," where mmddyy is the current date (e.g., 12/11/2001 is 121101), hhmmss is the current 24-hour time (i.e., 18:35:24 is 183524), and B is the database revision level. The upload file, now present

in the Upload Files sub-directory, is an MS Access 97 Data base file containing only "NSR ..." Tables.

• The selected determinations are removed from the working data base.

Please note that your archived determinations are safe and can be retrieved. Please contact the CATC at (919) 541-0800 for assistance if this becomes necessary.

To create an Editor Upload File:

- 1. Go to the Editor's main menu.
- 2. Press the Create Upload File button.
- 3. In the Create Upload File window, first read the Create Upload File instructions and then either press the Next button to continue to the Select Facilities window or the Cancel button to return to the main menu.
- 4. The Select Facilities window will open. The box on the left side of the window displays a list of the determinations currently in your working data base. Click on a determination to select it. The box on the right side of the window will contain determinations you select for upload. The Details box at the bottom of the window displays facility information for a selected determination for verification purposes.
- 5. After selecting a determination, click the ">" button to move the determination from the Available determinations box to the Selected Determination box. To move them all at once, click the ">>" button.
- 6. Use the "<" and "<<" as described in step 5 to move determinations from the Selected box to

the Available box.

- 7. Click the Create Upload File button once you have completed the selection process or the Go to Main Menu button to return to the main menu.
- 8. Note the location of the file in the file creation confirmation dialog box and click the OK button to continue to the main menu.

# 5.5.3.6 PREVIEW OR PRINT A DETERMINATIONS REPORT

The RBLC Editor allows you to view or print a "Freeform" determination report containing all determinations in your working data base. To view or print the Determination Report:

- 1. Go to the Editor's main menu.
- 2. Press the Preview/Print Report button.
- 3. In the Preview/Print Report window, use the scroll bars to view the report or press the Print button to print the report. Use the Quit button to return to the main menu.

#### 5.5.4 SENDING AN EDITOR UPLOAD FILE TO EPA

Periodically, the Upload File (determinations) should be sent to the RBLC System Administrator for review and inclusion in the RBLC Web Site

E-mail the Upload File by attaching it to an E-mail message addressed to the CATC at E-mail address:

#### catcmail@epa.gov

Be sure to include the sender's name, mailing address, and phone number in body of the message, in case there are any questions about the submittal.

If E-mail is not available, then copy the Upload File to a diskette and mail it to:

RBLC
MD-E143-03
U.S. Environmental Protection Agency
Research Triangle Park, NC 27711

Be sure to include the sender's name, mailing address, and phone number with the disk, in case there are any questions about the submittal.

When the Upload File is received at EPA, the RBLC System Administrator reviews it to make certain that all of the data files are there. Then, the determination is assigned a permanent RBLC ID and added to the website. The sender is notified via mail that the determinations are on-line, what the RBLC IDs are, and any deficiencies in the submittal. The RBLC Web Site's Edit option can be used to correct any of the problems.

#### 5.5.5 PLANNING AND PREPARATION

Agencies may wish to define procedures and quality standards for entry of determination data to the RBLC. Incomplete or incorrect data can result in repeated calls to the submitting agency for more information or to misunderstandings about the data. In some cases, appointing one person to coordinate a large data entry effort and to be the EPA contact point may be a logical approach. In other cases, defining specific procedures and tracking the progress of entries may be more than adequate. In all cases, quality assurance and quality control (QA/QC) standards should be maintained. See Section 5.5.6 for a suggested QA/QC checklist.

Data entry and edits man be done most efficiently when the RBLC web data requirements and data fields are understood and the permit information has been organized before beginning entry. It is recommended that the permit information be organized before entry, so that all of the required information (e.g., codes, units, and abbreviations) will be on hand during data entry.

Refer to Section 5.5.6 of this document for:

- C Descriptions of data fields;
- C Required data fields, units, and formats; and
- C Data organization tips.

Keep in mind that the permit information needs to be entered in such a way that the data base search routines will be able to find it when it is relevant. Take the time to accurately match RBLC process type codes and Source Classification Codes (SCCs) to the processes, and to describe control devices or pollution prevention technology. Identify processes and pollutants for which standard emission limits are required. The RBLC Reference Library, accessed from the RBLC Web Main page, contains a link to EPA's CHIEF web site. CHEIF maintains text and data base files containing the North American Industry Classification System (NAICS) Codes, Source Industrial Classification (SIC) Codes, and the SCCs needed to accurately categorize facilities and processes.<sup>2</sup> See Appendix E for a list of all processes with standardized emission limits.

<sup>&</sup>lt;sup>2</sup> The U.S Census Bureau maintains a Web site which cross references SIC codes with the North American Industry Classification System (NAICS) of industrial codes: http://www.census.gov/epcd/www/naics.html. The EPA's Emission Factor and Inventory Group maintains the list of SCCs and any updates of those codes can be found at: http://www.epa.gov/ttn/chief/codes/index.html.

At a more general level, identify the information needed to enter a complete determination. A determination must have information at the facility, process, and pollutant levels. Identify all likely pollutants for a process and be prepared to address them all, either as pollutant entries or explanatory notes in the process entry. Identify situations where a single process or piece of equipment may need to be entered as multiple process entries or several processes may need to be combined (see the examples below). When questions arise about how to enter non-standard situations, please contact the RBLC Webmaster.

# EXAMPLE - ONE PROCESS, MANY EMISSION LIMITS

**Problem:** Separate emission limits for NO<sub>x</sub> emissions have been set for multiple operation scenarios for turbines at a power plant. There are six operation scenarios based on three different fuel options and whether the turbines operate as simple or combined cycle. Emission limits for other pollutants are the same regardless of the scenario.

**Solution:** Enter the scenarios as six separate processes (process type codes and SCCs change for each scenario), and enter the NO<sub>x</sub> emissions limits for each. Create a seventh process for the generic process (mixed fuels, and simple or combined cycles undefined), and enter the remaining pollutant limits under the seventh process. Document and explain this approach in the facility and process notes.

#### EXAMPLE - MANY IDENTICAL PROCESSES, ONE SET OF EMISSION LIMITS

**Problem:** Eight identical natural gas fueled turbines, vented through a single stack, are permitted together with identical emission limits. Emission limits are expressed in units of pounds per hour for each turbine, and parts per million exiting from the stack. How should the turbines' emission limits be entered in the RBLC?

**Solution:** Enter all eight turbines as a single process. Specify in the process notes the number of turbines and whether the throughput is the combined throughput or throughput for each turbine. Enter the emission limits, remembering to enter the parts per million emission limit in the standard emission limit fields. Specify in the notes field that the pounds per hour emission limit is for each individual turbine.

#### 5.5.6 DATA FIELDS AND FORMATS

For a determination to be considered complete and eligible for promotion to the permanent RBLC data base, certain data fields must be entered, and required data formats must be observed. Data for many of the searchable fields must be entered before a screen can be saved. In the on-line data entry forms, the required fields are marked with a diamond (—).

Use Table 5.1 to identify required and recommended data fields. These requirements help insure that searches will be productive and that the data base contains information that is helpful to most users. Data elements marked as recommended fields are those that may be required under future NSR regulations. Collecting and entering these data will improve the quality and usefulness of the data base.

Refer to Appendix A and the on-line documentation for instructions for entries to each data field. As discussed previously, planning and organizing the data beforehand will make the data entry process more efficient. Figure 5.1 is a suggested QA/QC checklist for entries.

After a determination has been entered into the system, EPA will review the entry, follow up with the agency if necessary, and then promote the completed entry from Draft to Final.

TABLE 5.1
NAMES AND CHARACTERISTICS OF RBLC DATA FIELDS

FIELD NAME	REQUIRED; RECOMMENDED; OR NOT REQUIRED	USED FOR QUERIES	NOTES
FACILITY LEVEL INFORMA	ATION		
RBLC ID	Required	Y	Assigned by the system. Unique to each determination.
Company Name	Not required	Y	Name of the parent company, if applicable
Plant/Company name	Required	Y	Name of the facility
Plant contact name	Recommended	N	
Plant contact's street address	Recommended	N	Plant Contact's mailing address, may not be facility
Plant contact's city, state and zip code	Recommended	N	address. Zip codes can be found at: http://www.usps.gov/ncsc/lookups/lookups.htm.
Plant contact's telephone/fax	Recommended	N	
Plant contact's email address	Recommended	N	
Plant location - UTM coordinates	Recommended	N	Actual plant location
Plant location - County	Not required	N	
Plant location - State	Required	Y	Assigned by the system.

FIELD NAME	REQUIRED; RECOMMENDED; OR NOT REQUIRED	USED FOR QUERIES	NOTES
EPA Region	Required	Y	Choose from a drop-down list.
Agency Code and Name	Required	Y	Choose from a drop-down list.
Agency Contact and Telephone Number	Required	N	Choose from a drop-down list.
Public Hearing	Not Required	N	
New/Modified Source	Required	N	
Permit Number	Required	Y	
AIRS Facility Number (universal Plant ID)	Recommended	Y	
NAICS Code	Recommended	Y	Complete list on CHIEF web site
SIC Code	Required	Y	Drop down list; complete list on CHIEF web site
Application Received	Recommended	N	
Permit Issue Date	Required	Y	Must be actual date in order for the determination to be promoted to the Final data base.
Start-up Date	Recommended	N	
Compliance Verification Date	Recommended	N	
Facility Notes	Recommended	N	Notes allow the entry of non-standard information.

FIELD NAME	REQUIRED; RECOMMENDED; OR NOT REQUIRED	USED FOR QUERIES	NOTES	
Affected Class 1 Areas	Recommended	Y		
Plant Narrative/Emission Sources/Fuel/Abatement Description	Recommended	N		
Plantwide Emissions	Recommended	Y		
PROCESS LEVEL INFORMA	PROCESS LEVEL INFORMATION			
Process Description	Required	Y		
Process Type	Required	Y	Includes process type code, selected from a drop-down list. Also listed in Appendix D of this User's Manual.	
Source Category Code (SCC)	Required	Y	A listing of SCCs can be found on the RBLC Documents page.	
Primary Fuel	Recommended	N	For combustion units only	
Throughput Capacity and Units	Not Required	N	If this information is CBI, it should <b>not</b> be entered.	
Compliance Verification	Recommended	N		
Process Notes	Recommended	N		

FIELD NAME	REQUIRED; RECOMMENDED; OR NOT REQUIRED	USED FOR QUERIES	NOTES
POLLUTANT LEVEL INFOR	RMATION		
Pollutant Name/Chemical Abstract Service (CAS) Number	Required	Y	Select pollutant name and CAS number from the drop-down list.
Control Method Code	Required	Y	
Control Method Description	Required*	Y	* A control method description is not required when there are no controls (control method code = N)
Number of Control Options Considered	Not Required	N	
Rank of Option Selected	Not Required	N	
Emission Limit 1	Required*	Y	*An emission limit is required for every pollutant entry. Three exceptions are allowed, although it is still recommended that you provide a primary emission limit. The exceptions are:  1) If no control is used, (control method code = N);  2) If a standardized emission limit is listed; or  3) If percent efficiency is substituted as a limit as part of the permit.
Emission Limit 1 Unit	Required	Y	An emission unit is required if a limit has been entered.

FIELD NAME	REQUIRED; RECOMMENDED; OR NOT REQUIRED	USED FOR QUERIES	NOTES
Emission Limit 1 Other Conditions	Not Required	N	Conditions that apply to the limit, such as operating conditions, or averaging period.
Emission Limit 2	Not Required	N	
Emission Limit 2 Unit	Not Required	N	An emission unit is required if a limit has been entered.
Emission Limit 2 Other Conditions	Not Required	N	Conditions that apply to the limit, such as operating conditions, or averaging period.
Standardized Emission Limit	Required*	Y	* For all processes, the emission limit for visible emissions (VE as percent opacity) should be listed in the standardized emission limit field.  A standardized emission limit is required for the pollutants listed under the process type codes in Appendix E, <i>RBLC Standard Emission Units by Process Type Code</i> . If the process type and pollutant is not listed in Appendix E, an emission limit is not required.
Standardized Emission Limit Unit	Required	Y	An emission unit is required if a limit has been entered.
Standardized Emission Limit Other Conditions	Not Required	N	Conditions that apply to the limit, such as operating conditions, or averaging period.

FIELD NAME	REQUIRED; RECOMMENDED; OR NOT REQUIRED	USED FOR QUERIES	NOTES
Emission Limit Basis	Required	Y	
% Efficiency	Recommended	N	See note on primary emission limits above.
Emission Type	Required	Y	Options are: P (point), A (area), and F (fugitive).
Costs Verified by Agency	Recommended	N	
Capital Cost of Control Equipment	Not Required	N	If this information is CBI, it should <b>not</b> be entered.
O/M Cost of Control Equipment	Not Required	N	If this information is CBI, it should <b>not</b> be entered.
Year Used in Cost Estimates	Recommended	N	If this information is CBI, it should <b>not</b> be entered.
Annualized Cost	Not Required	N	In dollars
Cost Effectiveness	Recommended	N	In dollars per ton
Incremental Cost Effectiveness	Recommended		
Pollutant Notes	Not required	N	

# QA/QC Checklist for Data Entry and Editing

# For the Entire Determination

- C Keep in mind the general goals of a QA review: insuring entry completeness, and accuracy in data entry, coding, naming, and reasonableness.
- C Throughout the determination entry, check for typographical errors and misspellings, even in the notes fields. Make sure that the notes are concise, well worded, and informative.
- C Check for accuracy in data entry.
- C Check all required and recommended data fields. Use Table 5.1 and Appendix A to identify those fields.

# **Facility Level Input Form**

- 1) Are name, address and location data reasonable and correct? Review entries for UTM coordinates. UTM coordinates are defined as zone, easting and northing (x and y coordinates, respectively). The conterminous 48 States are covered by 10 zones, from Zone 10 on the west coast through Zone 19 in New England. Alaska is covered by zones 10 through 2, and Hawaii by zones 4 and 5.
- 2) Check NAICS and SIC codes. If you were looking for information about this type of facility, would you search using the code that has been assigned?
- 3) Is the permit issued date an actual or estimated date? Is the permit issued date after the application received date? Actual start up and compliance dates are especially helpful to users of the data base because those dates indicate that the project is actually operating. These should be entered if they are available.

# **Process Level Input Form**

- 4) Are all of the processes covered by the determination included? Are the processes defined so that pollutants, controls and limits can be entered in an understandable way for each one?
- 5) Check the process name. Does it use the standard naming approach for processes described in the data entry instructions in Appendix A, *RBLC Data Submittal Form and Instructions* (e.g., turbine, single cycle, natural gas)?

Figure 5.1: QA/QC Checklist

- 6) Check the SCC designations. If you were looking for this process, would you search using the code that you assigned?
- 7) Check the units for throughput. Use Appendix D to check units abbreviations.
- 8) If throughput is not in terms of fuel, is information provided about the throughput material in the notes?
- 9) Has compliance information been entered? If compliance has been verified using "other" methods, have these methods been specified under "describe other"?

# **Pollutant Level Input Form**

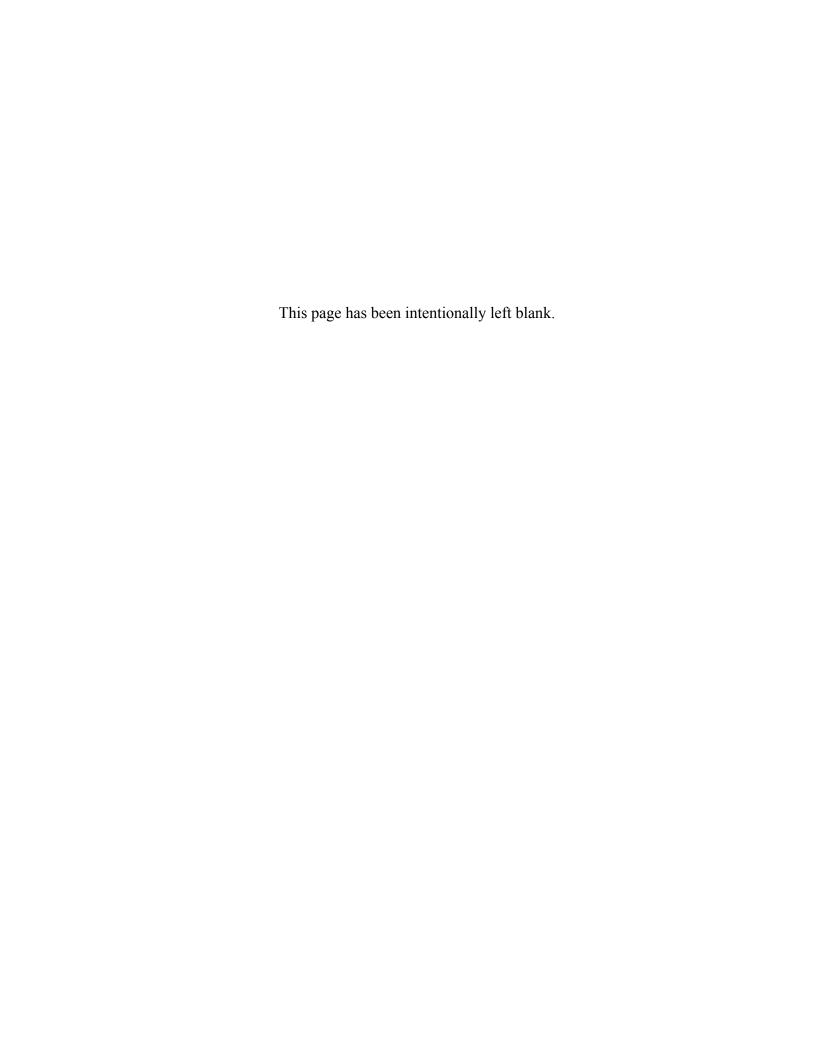

- 10) Are all of the pollutants included for each process? In many cases, the permit addresses only one or a few of the pollutants that can be expected to be emitted from a process. If there are pollutants that are not included in the determination for a process, include an explanation in the process notes.
- 11) Is the Control Method Code properly assigned? Remember that a device added to a process that reduces emissions during the process (e.g., low-NO<sub>x</sub> burners) should be defined as pollution prevention, not as an add-on. Pollution prevention encompasses recycling, materials changes and reformulation, and pollution reduction technology that is integral to the process.
- 12) If the control method code is add on, pollution prevention or both (add on and pollution prevention), there must be a description of the control method in the text field.
- 13) Check the descriptors for add on control devices and pollution prevention methods. Use the names and abbreviations in Appendix D, *RBLC Process, Unit, and Pollutant Abbreviations* to insure that consistent terms are used throughout the data base.
- 14) Have emission limits been entered? Limits can be entered as either emissions or as a control's percent efficiency. If the only limit is the percent efficiency, the efficiency should be entered in the field for emission limit 1 and in the percent efficiency field.
- 15) Are pollutant emission limits, and percent efficiency levels reasonable?

Figure 5.1: QA/QC Checklist, continued.

- 16) Check units for emission limits 1 and 2. Use Appendix D to check abbreviations for emission units.
- 17) Emission limits for visible emissions (VE) should be expressed as percent opacity (% opacity). VE emission limits for all processes should be entered in the standardized emission limit field.
- 18) Check the processes in the determination against the list of processes included in Appendix E, *RBLC Standard Emission Units by Process Type Code*. If a process matches any of those on that list, there should be a standardized emission limit entered for the pollutants listed for that process.

Figure 5.1: QA/QC Checklist, continued.

# APPENDIX C PROCESS TYPE CODE LISTING

# Appendix C -- Process Code Listing

**PLEASE NOTE:** The RBLC is currently in the process of re-organizing the Process Type Code (PTC) system. To date, the external combustion sources (formerly PTC 11.xxx) have been modified and are reflected in this list. The new codes include 11.xxx, 12.xxx, 13.xxx, and 14.xxx. The archived external combustion PTCs still be found at the end of this Appendix.

RBLC is currently working on the internal combustion (15.xxx) codes.

# 10.000 FUEL COMBUSTION

- 11.000 Utility- and Large Industrial-Size Boilers/Furnaces (> 250 MMBtu/h)
- 11.100 Solid Fuel & Solid Fuel Mixtures
  - 11.110 Coal (includes bituminous, subbituminous, anthracite, and lignite)
  - 11.120 Biomass (includes wood, wood waste, bagasse, and other biomass)
  - 11.130 Other Solid Fuel & Solid Fuel Mixtures
- 11.200 Liquid Fuel & Liquid Fuel Mixtures
  - 11.210 Residual Fuel Oil (ASTM # 4,5,6)
  - 11.220 Distillate Fuel Oil (ASTM # 1,2, includes kerosene, aviation, diesel fuel)
  - 11.230 Other Liquid Fuel & Liquid Fuel Mixtures
- 11.300 Gaseous Fuel & Gaseous Fuel Mixtures
  - 11.310 Natural Gas (includes propane and liquefied petroleum gas)
  - 11.320 Other Gaseous Fuel & Gaseous Fuel Mixtures
- 11.900 Other Fuels and Combinations (e.g., solid/liquid, liquid/gas)
- 12.000 Industrial-Size Boilers/Furnaces (> 100 MMBtu/h & <= 250 MMBtu/h)
- 12.100 Solid Fuel & Solid Fuel Mixtures
  - 12.110 Coal (includes bituminous, subbituminous, anthracite, and lignite)
  - 12.120 Biomass (includes wood, wood waste, bagasse, and other biomass)
  - 12.130 Other Solid Fuel & Solid Fuel Mixtures
- 12.200 Liquid Fuel & Liquid Fuel Mixtures
  - 12.210 Residual Fuel Oil (ASTM # 4,5,6)
  - 12.220 Distillate Fuel Oil (ASTM # 1,2, includes kerosene, aviation, diesel fuel)
  - 12.230 Other Liquid Fuel & Liquid Fuel Mixtures
- 12.300 Gaseous Fuel & Gaseous Fuel Mixtures

- 12.310 Natural Gas (includes propane and liquefied petroleum gas)
- 12.320 Other Gaseous Fuel & Gaseous Fuel Mixtures
- 12.900 Other Fuels and Combinations (e.g., solid/liquid, liquid/gas)
- 13.000 Commercial/Institutional-Size Boilers/Furnaces (<= 100 MMBtu/h)
- 13.100 Solid Fuel & Solid Fuel Mixtures
  - 13.110 Coal (includes bituminous, subbituminous, anthracite, and lignite)
  - 13.120 Biomass (includes wood, wood waste, bagasse, and other biomass)
  - 13.130 Other Solid Fuel & Solid Fuel Mixtures
- 13.200 Liquid Fuel & Liquid Fuel Mixtures
  - 13.210 Residual Fuel Oil (ASTM # 4,5,6)
  - 13.220 Distillate Fuel Oil (ASTM # 1,2, includes kerosene, aviation, diesel fuel)
  - 13.230 Other Liquid Fuel & Liquid Fuel Mixtures
- 13.300 Gaseous Fuel & Gaseous Fuel Mixtures
  - 13.310 Natural Gas (includes propane and liquefied petroleum gas)
  - 13.320 Other Gaseous Fuel & Gaseous Fuel Mixtures
- 13.900 Other Fuels and Combinations (e.g., solid/liquid, liquid/gas)
- 14.000 Miscellaneous Heaters and Furnaces (unknown size)
- 14.100 Solid Fuel & Solid Fuel Mixtures
- 14.200 Liquid Fuel & Liquid Fuel Mixtures
- 14.300 Gaseous Fuel & Gaseous Fuel Mixtures
- 14.900 Other/Unknown Fuels and Combinations (e.g., solid/liquid, liquid/gas)
- 15.000 Large Combustion Turbines (more than 25 MW)
- 15.100 Simple Cycle (turbine alone w/out waste heat recovery)
  - 15.110 Natural Gas (includes propane and liquefied petroleum gas)
  - 15.120 Other Gaseous Fuel & Gaseous Fuel Mixtures
  - 15.130 Liquid Fuel & Liquid Fuel Mixtures
- 15.200 Combined Cycle & Cogeneration
  - 15.210 Natural Gas (includes propane and liquefied petroleum gas)

15.220 Other Gaseous Fuel & Gaseous Fuel Mixtures

15.230 Liquid Fuel & Liquid Fuel Mixtures

15.900 Other/Unknown Cycle and/or Fuel

#### 16.000 Small Combustion Turbines (25 MW or less)

16.100 Simple Cycle (turbine alone w/out waste heat recovery)

16.110 Natural Gas (includes propane and liquefied petroleum gas)

16.120 Other Gaseous Fuel & Gaseous Fuel Mixtures

16.130 Liquid Fuel & Liquid Fuel Mixtures

16.200 Combined Cycle & Cogeneration

16.210 Natural Gas (includes propane and liquefied petroleum gas)

16.220 Other Gaseous Fuel & Gaseous Fuel Mixtures

16.230 Liquid Fuel & Liquid Fuel Mixtures

16.900 Other/Unknown Cycle and/or Fuel

# 17.000 Internal Combustion Engines

17.100 Large Internal Combustion Engines (more than 500 horsepower)

17.110 Fuel Oil (ASTM #1,2, includes kerosene, aviation, diesel fuel)

17.120 Other Liquid Fuel & Liquid Fuel Mixtures

17.130 Natural Gas (includes propane and liquified petroleum gas)

17.140 Other Gaseous Fuel & Gaseous Fuel Mixtures

17.150 Other/Unknown Fuel

17.200 Small Internal Combustion Engines (500 horsepower or less)

17.210 Fuel Oil (ASTM #1,2, includes kerosene, aviation, diesel fuel)

17.220 Other Liquid Fuel & Liquid Fuel Mixtures

17.230 Natural Gas (includes propane and liquified petroleum gas)

17.240 Other Gaseous Fuel & Gaseous Fuel Mixtures

17.250 Other/Unknown Fuel

# 18.000 (reserved)

#### CODE PROCESS TYPE

- 19.000 Miscellaneous Combustion
- 19.100 Misc. Boilers, Furnaces, Heaters
- 19.200 Misc. Combustion Turbines
- 19.300 Misc. Internal Combustion Engines
- 19.900 Other Misc. Combustion

# 20.000 WASTE DISPOSAL

# 21.000 MUNICIPAL WASTE

- 21.001 Municipal Waste Combustors/Incinerators
- 21.002 Municipal Waste Landfills
- 21.003 Publicly Owned Treatment Works (POTW) Emissions (except 21.004)
- 21.004 Sewage Sludge Incineration
- 21.999 Other Municipal Waste Processing/Disposal Facilities

# 22.000 HAZARDOUS WASTE

- 22.007 Asbestos Demolition, Renovation, and Disposal
- 22.001 Benzene Waste Treatment
- 22.006 Contaminated Soil Treatment
- 22.002 Hazardous Waste Incineration
- 22.003 Hazardous Waste Landfills
- 22.004 Site Remediation
- 22.005 Treatment, Storage and Disposal Facilities (TSDF) (except 22.002, 22.003 & 22.006)
- 22.999 Other Hazardous Waste Processing/Disposal Facilities

# 29.000 OTHER WASTE DISPOSAL (except 21 & 22)

- 29.001 Automobile Body Shredding/Incineration
- 29.002 Industrial Wastewater/Contaminated Water Treatment

- 29 003 Industrial Landfills
- 29.004 Medical/Infectious Waste Incineration
- 29.999 Other Waste Disposal Sources

#### 30.000 WOOD PRODUCTS INDUSTRY

- 30.001 Charcoal
- 30.002 Kraft Pulp Mills
- 30.003 Plywood and Veneer Operations
- 30.004 Pulp and Paper Production other than Kraft
- 30.005 Reconstituted Panelboard Plants (waferboard, particleboard, etc.)
- 30.006 Wood Treatment
- 30.007 Woodworking
- 30.999 Other Wood Products Industry Sources

#### 40.000 ORGANIC EVAPORATIVE LOSSES

#### 41.000 SURFACE COATING/PRINTING/GRAPHIC ARTS

- 41.001 Aerospace Surface Coating
- 41.002 Automobiles and Trucks Surface Coating (OEM)
- 41.003 Automotive Refinishing
- 41.004 Can Surface Coating
- 41.005 Fabric Coating/Printing/Dyeing (except 41.017)
- 41.006 Flatwood Paneling Surface Coating
- 41.007 Flexible Vinyl & Urethane Coating/Printing
- 41.008 Large Appliance Surface Coating
- 41.026 Leather Surface Coating
- 41.009 Magnetic Tape Surface Coating
- 41.010 Magnetic Wire Surface Coating
- 41.011 Metal Coil Surface Coating
- 41.012 Metal Furniture Surface Coating
- 41.013 Miscellaneous Metal Parts and Products Surface Coating
- 41.014 Paper, Plastic & Foil Web Surface Coating (except 41.007 & 41.018)

- 41.015 Plastic Parts for Business Machines Surface Coating
- 41.016 Plastic Parts & Products Surface Coating (except 41.015)
- 41.017 Polymeric Coating of Fabrics
- 41.018 Pressure Sensitive Tapes and Labels Coating
- 41.019 Printing Forms
- 41.020 Printing News Print
- 41.021 Printing Packaging
- 41.022 Printing Publication
- 41.023 Printing/Publication (except 41.007 & 41.019-022)
- 41.024 Ship Building & Repair Surface Coating
- 41.025 Wood Products/Furniture Surface Coating (except 41.006)
- 41.999 Other Surface Coating/Printing/Graphic Arts Sources

# 42.000 LIQUID MARKETING (PETROLEUM PRODUCTS, GASOLINE, VOL)

- 42 001 Gasoline Bulk Plants
- 42.002 Gasoline Bulk Terminals
- 42.003 Gasoline Marketing (except 42.001 & 42.002)
- 42.004 Petroleum Liquid Marketing (except 42.001-003 & 42.005-006)
- 42.005 Petroleum Liquid Storage in Fixed Roof Tanks
- 42.006 Petroleum Liquid Storage in Floating Roof Tanks
- 42.009 Volatile Organic Liquid Storage
- 42.010 Volatile Organic Liquid Marketing (except 42.009)
- 42.999 Other Liquid Marketing Sources

# 49.000 ORGANIC EVAPORATIVE LOSSES (except 41 & 42)

- 49.001 Aerosol Can Filling
- 49.012 Architectural & Industrial Maintenance (AIM) Coatings
- 49.013 Automobile Refinish Coatings
- 49.011 Consumer Products
- 49.002 Dry Cleaning PERC/Chlorinated Solvents
- 49.003 Dry Cleaning Petroleum Solvents
- 49.004 Fiberglass Boat Manufacturing
- 49.005 Fiberglass/Reinforced Polymer Products Manufacturing (except 49.004)

- 49.006 Halogenated Solvent Cleaners
- 49.007 Ink Manufacturing
- 49.008 Organic Solvent Cleaning & Degreasing (except 49.006)
- 49.009 Paint/Coating/Adhesives Manufacturing
- 49.010 Paint Stripping
- 49.999 Other Organic Evaporative Loss Sources

## 50.000 PETROLEUM/NATURAL GAS PRODUCTION AND REFINING

- 50.001 Oil and Gas Field Services
- 50.002 Natural Gas/Gasoline Processing Plants
- 50.003 Petroleum Refining Conversion Processes (cracking, CO boilers, reforming, alkylation, polymerization, isomerization, coking)
- 50.007 Petroleum Refining Equipment Leaks/Fugitive Emissions
- 50.004 Petroleum Refining Feedstock (blending, loading and unloading)
- 50.008 Petroleum Refining Flares and Incinerators (except acid gas/sulfur recovery unit incinerators 50.006)
- 50.005 Petroleum Refining Separation Processes (distillation and light ends recovery)
- 50.006 Petroleum Refining Treating Processes (hydrodesulfurization, hydrotreating, chemical sweetening, acid gas removal, deasphalting, sulfur recovery units, acid gas/sulfur recovery unit incinerators)
- 50.009 Petroleum Refining Wastewater and Wastewater Treatment
- 50.010 Shale Processing
- 50.999 Other Petroleum/Natural Gas Production & Refining Sources (except 50.001-010 and 42.000 Liquid Marketing

#### 60.000 CHEMICALS MANUFACTURING

#### 61,000 AGRICULTURAL CHEMICALS MANUFACTURING

- 61.001 2,4-D Salts and Esters Production
- 61.002 4-Chloro-2-Methylphenoxyacetic Acid Production

- 61.003 4,6-Dinitro-o-Cresol Production
- 61.004 Captafol (tm) Production
- 61.005 Captan (tm) Production
- 61.006 Chloroneb (tm) Production
- 61.007 Chlorthalonil (tm) Production
- 61.008 Dacthal (tm) Production
- 61.012 Fertilizer Production (except 61.009)
- 61.009 Phosphate Fertilizers Production
- 61.010 Sodium Pentachlorophenate Production
- 61.011 Tordon Acid Production
- 61.999 Other Agricultural Chemical Manufacturing Sources

#### 62.000 INORGANIC CHEMICALS MANUFACTURING

- 62.001 Ammonium Sulfate Production Caprolactam By-Product Plants
- 62.002 Antimony Oxides Manufacturing
- 62.003 Chlorine Production
- 62.016 Chloroalkali Production
- 62.004 Chromium Chemicals Manufacturing
- 62.005 Cyanuric Chemicals Manufacturing
- 62.006 Fume Silica Production
- 62.007 Hydrochloric Acid Production
- 62.017 Hydrofluoric Acid Production
- 62.008 Hydrogen Cyanide Production
- 62.009 Hydrogen Fluoride Production
- 62.020 Inorganic Liquid/Gas Storage & Handling
- 62.014 Nitric Acid Plants
- 62.010 Phosphoric Acid Manufacturing
- 62.011 Quaternary Ammonium Compounds Production
- 62.018 Sodium Carbonate Production
- 62.012 Sodium Cyanide Production
- 62.015 Sulfuric Acid Plants
- 62.019 Sulfur Recovery (except 50.006)
- 62.013 Uranium Hexafluoride Production
- 62.999 Other Inorganic Chemical Manufacturing Sources

#### 63,000 POLYMER AND RESIN PRODUCTION

- 63.001 Acetal Resins Production
- 63.002 Acrylonitrile-Butadiene-Styrene Production
- 63.003 Alkyd Resins Production
- 63.004 Amino Resins Production
- 63.005 Butadiene-Furfural Cotrimer (R-11)
- 63.006 Butyl Rubber Production
- 63.007 Carboxymethylcellulose Production
- 63.008 Cellophane Production
- 63.009 Cellulose Ethers Production
- 63.010 Epichlorohydrin Elastomers Production
- 63.011 Epoxy Resins Production
- 63.012 Ethylene-propylene Rubber Production
- 63.013 Flexible Polyurethane Foam Production
- 63.014 Hypalon (tm) Production
- 63.015 Maleic Copolymers Production
- 63.016 Methylcellulose Production
- 63.017 Methyl Methacrylate-Acrylonitrile-Butadiene-Styrene Production
- 63.018 Methyl Methacrylate-Butadiene-Styrene Terpolymers Production
- 63.019 Neoprene Production
- 63.020 Nitrile Butadiene Rubber Production
- 63.021 Non-Nylon Polyamides Production
- 63.022 Nylon 6 Production
- 63.023 Phenolic Resins Production
- 63.024 Polybutadiene Rubber Production
- 63.025 Polycarbonates Production
- 63.026 Polyester Resins Production
- 63.027 Polyether Polyols Production
- 63.028 Polyethylene Terephthalate Production
- 63.029 Polymerized Vinylidene Production
- 63.030 Polymethyl Methacrylate Resins Production
- 63.031 Polystyrene Production
- 63.032 Polysulfide Rubber Production
- 63.033 Polyvinyl Acetate Emulsions Production
- 63.034 Polyvinyl Alcohol Production
- 63.035 Polyvinyl Butyral Production

- - 63.036 Polyvinyl Chloride and Copolymers Production
  - 63.037 Reinforced Plastic Composites Production
  - 63.038 Styrene-Acrylonitrile Production
  - 63.039 Styrene Butadiene Rubber and Latex Production
  - 63.999 Other Polymer and Resin Manufacturing Sources

### 64.000 SYNTHETIC ORGANIC CHEMICAL MANUFACTURING INDUSTRY (SOCMI)

- 64.001 Batch Reaction Vessels (except 69.011)
- 64.002 Equipment Leaks (valves, compressors, pumps, etc.)
- 64.003 Processes Vents (emissions from air oxidation, distillation, and other reaction vessels)
- 64.004 Storage Tanks (SOCMI Chemicals (loading/unloading, filling, etc.)
- 64.005 Transfer of SOCMI Chemicals (loading/unloading, filling, etc.)
- 64.006 Wastewater Collection & Treatment
- 64.999 Other SOCMI Industry Sources

### 65.000 SYNTHETIC FIBERS PRODUCTION

- 65.001 Acrylic Fibers/Modacrylic Fibers Production
- 65.002 Rayon Production
- 65.003 Spandex Production
- 65.999 Other Synthetic Fibers Production Sources

# 69.000 CHEMICAL MANUFACTURING (except 61, 62, 63, 64 & 65)

- 69.001 Benzyltrimethylammonium Chloride Facilities
- 69.002 Butadiene Dimers Production
- 69.015 Carbon Black Manufacturing
- 69.003 Carbonyl Sulfide Production
- 69.004 Chelating Agents Production
- 69.005 Chlorinated Paraffins Production
- 69.006 Dodecanedioic Acid Production
- 69.007 Ethylidene Norbornene Production
- 69.008 Explosives Production

- 69.009 Hydrazine Production
- 69.010 OBPA/1,3-Diisocyanate Production
- 69.011 Pharmaceuticals Production
- 69.012 Photographic Chemicals Production
- 69.013 Phthalate Plasticizers Production
- 69.017 Propellant Manufacturing & Production
- 69.014 Rubber Chemicals Manufacturing
- 69.016 Soap & Detergent Manufacturing
- 69.999 Other Chemical Manufacturing Sources

# 70.000 FOOD AND AGRICULTURAL PRODUCTS (also see 61 - AGRICULTURAL CHEMICALS)

- 70.016 Alcohol Fuel Production
- 70.008 Alcoholic Beverages Production
- 70.001 Alfalfa Dehydrating
- 70.002 Baker's Yeast Manufacturing
- 70.003 Bread Bakeries
- 70.004 Cellulose Food Casing Manufacturing
- 70.005 Coffee Roasting
- 70.006 Cotton Ginning
- 70.007 Feed and Grain Handling, Storage & Processing (including Mills and Elevators)
- 70.009 Fish Processing
- 70.010 Fruit and Vegetable Processing
- 70.011 Meat Smokehouses
- 70.012 Roasting (except 70.005)
- 70.013 Starch Manufacturing
- 70.014 Sugar Cane Processing
- 70.015 Vegetable Oil Production
- 70.999 Other Food and Agricultural Products Sources

### 80.000 METALLURGICAL INDUSTRY

81.000 FERROUS METALS INDUSTRY

- 81.001 Coke By-product Plants
- 81.002 Coke Production (except 81.001)
- 81.003 Ferroalloy Production
- 81.004 Iron Foundries
- 81.005 Stainless Steel/Specialty Steel Manufacturing
- 81.006 Steel Foundries
- 81.007 Steel Manufacturing (except 81.005 & 81.006)
- 81.008 Steel Pickling HCL Process
- 81.999 Other Ferrous Metals Industry Sources

#### 82.000 NONFERROUS METALS INDUSTRY

- 82.016 Beryllium Processing and Manufacturing
- 82.001 Lead Acid Battery Manufacturing
- 82.002 Lead Acid Battery Reclamation
- 82.003 Lead Oxide and Pigment Production
- 82.004 Lead Products (except 82.001-002, 82.006 & 82.012)
- 82.005 Primary Aluminum Production
- 82.006 Primary Copper Smelting
- 82.007 Primary Lead Smelting
- 82.008 Primary Magnesium Refining
- 82.009 Primary Zinc Smelting
- 82.010 Secondary Aluminum Production
- 82.011 Secondary Brass & Brass Ingot Production
- 82.012 Secondary Copper Smelting & Alloying
- 82.013 Secondary Lead Smelting
- 82.014 Secondary Magnesium Smelting
- 82.015 Secondary Zinc Processing
- 82.999 Other Non-Ferrous Metals Industry Sources

# 90.000 MINERAL PRODUCTS

- 90.001 Alumina Processing
- 90.035 Asbestos Manufacturing
- 90.002 Asphalt/Coal Tar Application Metal Pipes

- 90.003 Asphalt Concrete Manufacturing
- 90.004 Asphalt Processing (except 90.002, 90.003 & 90.034)
- 90.034 Asphalt Roofing Products Manufacturing
- 90.017 Calciners & Dryers and Mineral Processing Facilities
- 90.005 Calcium Carbide Manufacturing
- 90.006 Cement Manufacturing (except 90.028)
- 90.007 Chromium Refractories Production
- 90.008 Clay and Fly Ash Sintering
- 90.009 Clay Products (including Bricks & Ceramics)
- 90.010 Coal Conversion/Gasification
- 90.011 Coal Handling/Processing/Preparation/Cleaning
- 90.012 Concrete Batch Plants
- 90.013 Elemental Phosphorous Plants
- 90.014 Frit Manufacturing
- 90.015 Glass Fiber Manufacturing (except 90.033)
- 90.016 Glass Manufacturing
- 90.017 Calciners
- 90.018 Lead Ore Crushing and Grinding
- 90.019 Lime/Limestone Handling/Kilns/Storage/Manufacturing
- 90.020 Mercury Ore Processing
- 90.021 Metallic Mineral/Ore Processing (except 90.018, 90.020 & 90.031)
- 90.022 Mineral Wool Manufacturing
- 90.023 Mining Operations (except 90.032)
- 90.024 Non-metallic Mineral Processing (except 90.011, 90.019, 90.017, 90.026) (NOTE: This category includes stone quarrying, sand and gravel processing, gypsum processing, perlite processing and all other non-metallic mineral/ore processing.)
- 90.026 Phosphate Rock Processing
- 90.027 Phosphogypsum Stacks
- 90.028 Portland Cement Manufacturing
- 90.029 Refractories
- 90.031 Taconite Iron Ore Processing
- 90.032 Underground Uranium Mines
- 90.033 Wool Fiberglass Manufacturing
- 90.999 Other Mineral Processing Sources

### 99.000 MISCELLANEOUS SOURCES

- 99.001 Abrasive Blasting
- 99.002 Chromic Acid Anodizing
- 99.003 Comfort Cooling Towers
- 99.004 Commercial Sterilization Facilities
- 99.005 Decorative Chromium Electroplating
- 99.006 Electronics Manufacturing (except 99.011)
- 99.013 Electroplating/Plating (except Chrome 99.002, 99.005 & 99.007)
- 99.019 Geothermal Power
- 99.007 Hard Chromium Electroplating
- 99.008 Hospital Sterilization Facilities
- 99.009 Industrial Process Cooling Towers
- 99.017 Leather Tanning
- 99.014 Polystyrene Foam Products Manufacturing
- 99.016 Polyurethane Foam Products Manufacturing
- 99.020 Rocket Demilitarization
- 99.010 Rocket Engine Test Firing
- 99.015 Rubber Tire Manufacturing and Retreading
- 99.011 Semiconductor Manufacturing
- 99.018 Synthetic Fuels Production (except 70.016 & 90.010)
- 99.012 Welding & Grinding
- 99.999 Other Miscellaneous Sources

# **ARCHIVED CODES:**

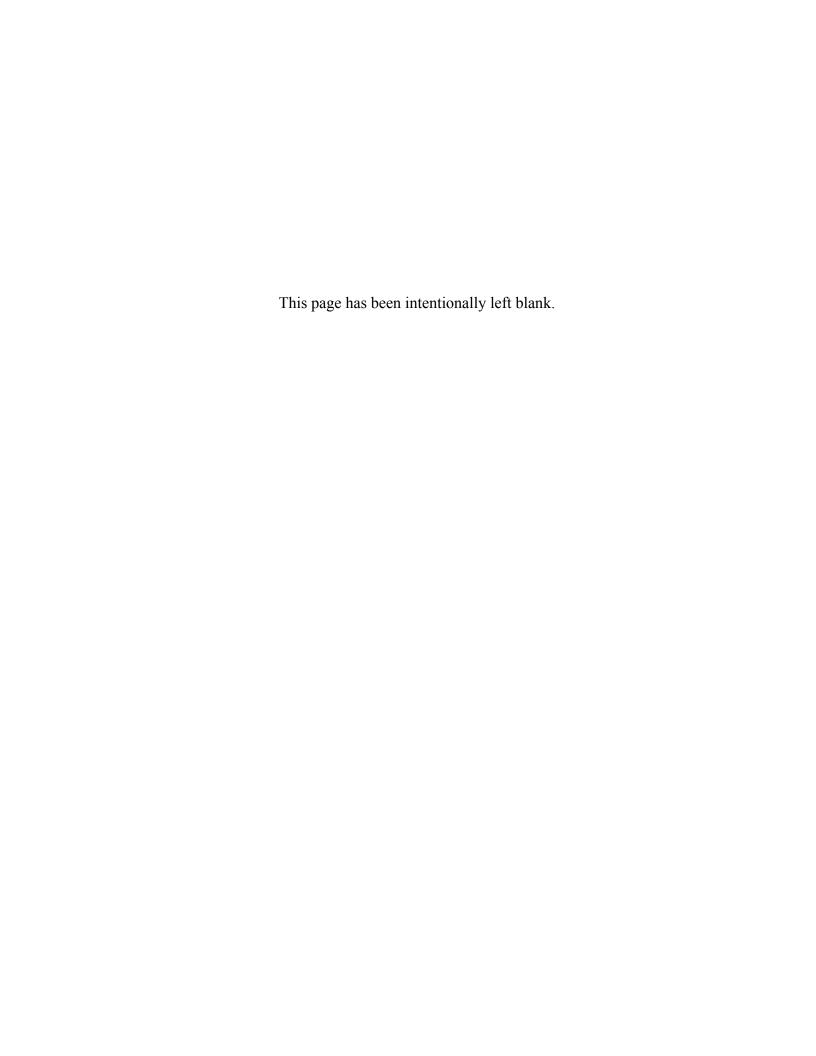

### 11.000 EXTERNAL COMBUSTION

- 11.001 Bagasses Combustion
- 11.002 Coal Combustion
- 11.006 Fuel Oil Combustion
- 11.003 Lignite Combustion
- 11.004 Multiple Fuels Combustion
- 11.005 Natural Gas Combustion
- 11.007 Waste Oil Combustion
- 11.008 Wood/Wood Waste Combustion
- 11.999 Other External Combustion Sources

# 15.000 INTERNAL COMBUSTION

- 15.001 Aviation Fuels
- 15.002 Diesel Fuel
- 15.006 Fuel Oil
- 15.003 Gasoline
- 15.007 Multiple Fuels
- 15.004 Natural Gas
- 15.005 Process Gas
- 15.999 Other Internal Combustion Sources

# APPENDIX D ABBREVIATIONS FOR PROCESSES, UNITS, AND POLLUTANTS

UG microgram (10<sup>-6</sup>)

N natural

NG nanogram (10<sup>-9</sup>)

OPAC opacity

PPM parts per million
PPH parts per hundred

% percent
% BY VOL % by volume
% BY WT % by weight
RDF refuse derived fuel

RESID residual

SB subbituminous SCF standard cubic feet

SCFD standard cubic feet per day
SCFH standard cubic feet per hour
SCFM standard cubic feet per minute

SEC second SQF square feet

T ton

T/D tons per day T/H tons per hour T/YR tons per year metric tonne **TONNE** VOL volume **WKS** weeks YD yard YR year

# Abbreviations for Pollutants

AbbreviationPollutantAGsilverANacrylonitrileARargonASarsenicBAbarium

BAP benzo(a)pyrene
BE beryllium
CA calcium
CD cadmium

CDD chlorodibenzodioxins
CDF chlorodibenzofurans

CL chlorine CL2 chlorine (gas)

CL2/OCL chlorine and oxychlorine

CLO2 chlorine dioxide
CO carbon monoxide
CO2 carbon dioxide
COS carbonyl sulfide
CR chromium

CRVI hexavalent chrome

CS cesium CU copper

DCB 1,4-dichloro-2-butene

ETH ethylene
ETO ethylene oxide
F fluorine
TF fluorides, total

FSP fine suspended particulates

HBR hydrogen bromide
HC hydrocarbons
HCL hydrochloric acid
HCN hydrogen cyanide

HDM hexamethylene diisocyanate monomer

HF hydrogen fluoride

HG mercury

HHD homopolymer of HDM (see above)

H2O water

H2S hydrogen sulfide H2SO4 sulfuric acid

H2SO4 mist sulfuric acid mist (also referred to as SAM)

MA maleic anhydride

**Abbreviation** Pollutant

MC ACETATE methyl cellusolve acetate MEK methyl ethyl ketone

MG magnesium

MI KETONE methyl isobutyl ketone
MMH methyl hydrazine
MN manganese
MO molybdenum
NAOH sodium hydroxide

NA2SO4 salt cake
NH3 ammonia
NH4 ammonium

NH4CL ammonium chloride

NI nickel

NMHC nonmethane hydrocarbons NMOC nonmethane organic carbon

NOX nitrogen oxide NO2 nitrogen dioxide N2O nitrous oxide

PAH polynuclear aromatic hydrocarbons

PB lead

PCB polychlorinated biphenyls
PCDF polychlorinated dibenzo furans
PCNB pentochloronitrobenzene herbicide

PM, PM10 particulate matter

POCL3 phosphorous oxychloride

POHC principle organic hazardous constituents

RHC reactive hydrocarbons
ROC reactive organic compounds
ROG reactive organic gases
RSC reduced sulfur compounds

S sulfur
SB antimony
SE selenium
SN tin

SO2 sulfur dioxide SO3 sulfur trioxide

TCDD 2,3,7,8-tetrachlorodibenzo-P-dioxin

TCDF tetrachlorodibenzo furan

TCE trichloroethylene
TC-ETHANE 1,1,1-trichloroethane
TF Total Fluorides

TICL4 titanium tetrachloride

TMT tetramethyl tin

**Abbreviation Pollutant** 

TRS total reduced sulfur

U uranium

UF4 uranium tetrafluoride

V vanadium VC vinyl chloride

VCM vinyl chloride monomer

VE visible emissions

VOC volatile organic compounds

ZN zinc

ZRSO4 zirconium sulfate

# Pollutant Name and CAS Number

# APPENDIX E RBLC STANDARD EMISSION UNITS BY PROCESS TYPE CODE

# Appendix E -- RBLC Standard Emission Units by Process Type Code

Standard emission units have been established for the processes listed below. These units are required for reporting standardized emission limits in the RBLC data base for these processes. Standardization of emission units facilitates ranking of emission control requirements on a pollutant specific basis. For visible emissions (VE), percent (%) opacity has been established as the standardized unit for all processes

Clearinghous Process Code ALL	se  2 / Name or Description  All Processes with Emission Limits for Visible Emissions	Pollutant Visible Emissions	Required Emission Units % Opacity
11.001 - 11.999	Electric Utility Steam Generators, Fossil Fuel-fired Steam Generators, Boilers, Furnaces, & Process Heaters	PM, PM10, PM2.5, SOx, NOx, CO	LB/MMBTU
15.001 - 15.999	I. C. Engines Stationary Gas Turbines	NOx, CO NOx, CO	G/B-HP-H PPM @ 15% O <sub>2</sub>
21.001	Municipal Waste Incinerators	PM, PM10, PM2.5 & Metals	GR/DSCF @ 7% O <sub>2</sub>
		(CD, PB, HG) SO2, HCL, CO, & NOx	PPM @ 7% O <sub>2</sub>
21.004	Sewage Sludge Incineration	PM, PM10 & PM2.5	LB/T of dry sludge input
30.002	Kraft Pulp Mills - Recovery Furnace Kraft Pulp Mills - Lime Kiln	PM, PM10 & PM2.5 PM, PM10	GR/DSCF @ 8% O <sub>2</sub> GR/DSCF @ 10% O <sub>2</sub>
	-	& PM2.5
